

RANGER LIVE™ MOBILE PLATFORM

The Ranger Live™ mobile platform is a customized suite of applications our field crews use at the job site via tablet. The suite includes eQHSE™ safety and quality system, eDrive™ vehicle tracking and driver behavior management system, eTicket™ electronic ticketing system, eRIGS™ Real time Data Acquisition system and cloud monitoring and ePMM™ preventive maintenance management system. Data is transmitted to the cloud, stored on Ranger's sequel server database, and accessible via a laptop, tablet or smartphone.

RANGER LEADS THE WAY

SUITE OF APPLICATIONS

- eQHSE™** - Policies, procedures, and safety alerts.
- eTicket™** - Job benchmarking and hour tracking.
- ePMM™** - Preventative maintenance scheduling.

WHY CHOOSE RANGER?

- **Positive Energy culture**
- **Highly qualified team**
- **State-of-the-art equipment**
- **Award winning safety environment**
- **Blue chip customer base**
- **Ranger Live™ Mobile Platform**
- **Advanced service solutions**
- **Broad geographic coverage**

eQHSE

The eQHSE application keeps our crews up to date with access to Ranger's safety and quality system including policies, procedures, forms such as QHSE observations, safety alerts, push notifications and much more.

eDRIVE

Our eDrive application provides access to driver behavior scorecards, Federal Motor Carrier Safety Admin compliance management, and vehicle tracking and management dashboards.

eTICKET

The eTicket application documents work activities and services performed during a job. Well information, personnel and equipment details are captured allowing for operational metrics for post-job reporting and benchmarking.

eRIGS

eRIGS is our data acquisition system that provides the ability to improve quality and safety performance, provide technical support, reduce non-productive time, identify best practices, benchmark operational performance, and implement operational improvements.

ePMM

ePMM is our preventative maintenance system that minimizes unscheduled maintenance to our assets by ensuring our equipment is inspected and repaired routinely according to preventative maintenance schedules.
